About this product

Contemporary 1080m³/h 60cm wall-mounted rangehood. Built-in InBuilt motor. Stainless steel canopy. Ideal for wall-mounted cooktops. Airflow: 1080 m³/h · Dimensions: 600 × 500mm Warranty: 5 Years Motor Warranty · 3 Years Canopy Warranty Frequently Asked Questions Why can't I hear the Schweigen rangehood? Schweigen's Isodrive® technology places the motor remotely in the roof cavity, ceiling void or exterior wall — away from the kitchen. The only sound at the cooktop is air moving through the filters, not a motor. What does Schweigen installation involve? Installation costs are comparable to a standard rangehood. The remote motor mounts in the ceiling, roof cavity or bulkhead with flexible ducting. Most Australian states require external venting to outside — check your state building code. Contact us for a referral to an experienced Schweigen installer near you. Is there an Australian warranty? Yes. All Schweigen products sold through authorised Australian dealers carry a full Australian warranty. Airdry is an authorised Schweigen dealer — all products purchased through us are covered and supported locally.

Brand	Schweigen
Airflow	1080 m ³ /h
Motor type	Isodrive® technology places the motor remotely in the roof cavity
Warranty	5 Years Motor Warranty
Price (incl. GST)	\$944.00
Availability	In stock

Frequently asked questions

How do I choose the correct rangehood size?

Rangehoods should ideally be larger than the cooking zone underneath to ensure optimal capture efficiency. Most rangehood types are available in 60 or 90cm width - covering the most common cooktop widths. Schweigen also has options for 120, 150 and 200cm width to cater for different install environments and requirements. Some models even come with enlarged depths to fit into deeper cabinetry for better coverage over the cooktop.

What ducting is recommended?

All Schweigen silent rangehoods powered by the German-made Isodrive Motor System include our Schweigen SteelFlex high performance safety ducting at no extra charge. Schweigen SteelFlex is the perfect solution to traditional ducting that may otherwise pose health and safety risks to homes. It is an ultra-strong and flexible high-performance safety duct made of Shirikon Firemesh.

What are the benefits of using LED lights?

LED (light emitting diode) lighting is very energy efficient. These lights generate very little heat, which means almost all the energy they consume is turned into light. They also last a long time (about 50 times longer than your average incandescent bulb).

What is the difference between baffle and mesh filters?

Mesh filters when compared to baffles have increased airflow and keep noise to a minimum. Baffles have a commercial look and are good for longevity. Baffles pros: Dishwasher-safe; Heavy-duty material and construction; Easy to remove; Lifetime warranty. Baffles cons: May be noisier than mesh filters; May drip oil if not cleaned well. Mesh filters pros: Dishwasher-safe; Captures more fat/oil particles; Easy to remove; Lifetime warranty.

How much is delivery?

Delivery is free on orders of \$500 or more anywhere in Australia. Orders under \$500 have a flat \$25 freight charge.

How long will my order take to arrive?

We dispatch from Erina NSW within 1–3 business days. Delivery usually takes 2–10 business days depending on where you are.

Do you deliver to WA, NT and Tasmania?

Yes — we deliver Australia-wide, including WA, NT, Tasmania and regional areas. Remote areas can take a few extra days.
